

VPG-2100 ReadMe

Please consult the FAQ and QuickStart Guide for operating instructions.

The following timings are unsupported:

-Any timings not supported by the output adapter technology.

-All timings below 300 horizontal or 200 vertical pixels.

-For HDMI: all timings below 720p are officially unsupported; however timings will be sent, scaled to 1280x720, and certain 800x600 timings will be sent correctly.

-832x624: @61Hz, @75Hz

-Mosaic Tiles are unsupported.

NOTE: THERE MAY BE OTHER TIMINGS NOT SUPPORTED BY THE VPG-2100. ENSURE THAT YOUR DEVICE'S EDID IS PROPERLY CONFIGURED.
